

## SEBASTIAN PALACIOS

ARCHITECT

### - ABOUT -

I define myself as a young architect engaged to a global society. I believe in the duty we have with others and the power of architecture as a **medium of change** in society. I procure to include **users and inhabitants opinions** while designing, as well as the cultural heritage factor. I support sustainable architecture over spectacular architecture, but value the role of innovation and plastic exploration. For me, it is all about **"creating city"** over creating fame.

### - BASIC INFO -
