CAREER OBJECTIVE

To pursue a career in creation and design, with acute and accurate planning sensibilities while being sensible towards factors making the design sustainable, flexible as well as functional. Putting thoughts towards the end users while creation of end products is the sole motto for an all round positive impact Architecture.

To these ends, I will continue to work, learn, and immerse myself in the field, to create to the best of my ability.

PROFESSIONAL EXPERIENCE

SV Consultants / Architect

November 2021 - August 2022

My role as an Architect entrusted me with the responsibility of working as a part, as well as, leading a team, while I also,

- Worked in high-end residential construction, providing optimal architectural designs for clients.

- Brought forth professionalism and expertise from design conception to completion.

- Worked collaboratively with Senior designers and Interns.

- Mentored Interns in achieving the design targets, while also nudging them towards their academic goals.

Meta Gaming Hub / Metaverse Architect

November 2021 - Part Time

- Worked in high-end Metaverse Projects, providing architectural point of view for the designs as per clients needs.

- 3dmodeling and integrate professional knowledge in multiple fields, including user interface, character design and also game design.

Bionics Design Studio / Principal Architect

Freelancing In Multiple firms

Self-practice after graduating presented me with various challenges and prepared me for what to expect in the working field for understanding not just the designing and construction part, but also handling of teams and its resources in the long run.

- Coordinated with all engineering disciplines and external consultants.

- Handled technical detailing and document production.

- Generated Architectural and Electrical drawings.

- Communicate with consultants, subcontractors, suppliers, planners, supervisors and others involved in a project.
